

Comet Personal Parking Meter User Guide

Comet Personal Parking Meter User Guide

GETTING STARTED

Your Comet comes loaded with an initial number of parking hours. Once this initial amount of time is used up, you will need to upload additional parking time (monetary value). For the purpose of this demonstration, you will be able to reload without any real payment.

Every time you switch the Comet on the date, the bank and the time of day are displayed. The bank is the amount of money that you have stored on your device. You should reload the Comet before the bank gets too low in order to ensure that you will have enough money for the next parking event.

BASIC USER INSTRUCTIONS

1. Switch the Comet by pressing the  button. After the Day ,Bank and Time are displayed you will see XX :YY where XX is two letters
2. Using the ▲ ▼ keys select the correct zone
3. Confirm by pressing the  button
4. Display the Comet facing outwards in the car window (open window slightly, place rubber strip in the window and close)
5. Upon returning to the vehicle, remove the Comet from the window and switch off by pressing the  for 3 seconds

Replacing the battery

The battery must be replaced within 5 minutes of being removed. If more than 5 minutes have passed, you will need to connect your Comet to the Comet site – via the USB cable to reset your clock to the correct time.

Reloading the Comet is done over the internet and is very simple and secure:

1. Enter the city/university' website for the purpose of the demonstration please visit www.ganis-systems.com/manual
2. Decide which option you wish to use - loading using codes or a USB connection

RELOADING USING A USB CONNECTION

1. The first time you connect the Comet, you will need to download a special driver from the site. Please follow the user instructions carefully to install this driver.
2. Once the driver has been installed, connect the Comet to the computer using a USB cable (purchased separately)
3. Enter the website and select the load via USB option
4. Enter the amount of money you wish to load onto your Comet
5. Enter your credit card details (for the purpose of this demonstration, you can enter any 16 digit number , no money will be charged)
6. Receive confirmation of payment
7. Click on the button "**Load Money into your Comet**" and the loading process will begin

N.B. Please make sure that the device is continuously connected during the whole loading process

RELOADING USING CODES

You will still need to purchase the additional parking time through the website, but will use this method if you do not use the USB cable.

In order to proceed, you will need to enter your credit card details (for the purpose of this demonstration, you can enter any 16 digit number, no money will be charged)

Enter the Comet website and click on the CODE option

1. You will be asked to enter the Comet's ID number (found on the back of the device)
2. Switch the Comet ON using the  key – you will see the city code displayed – e.g. KM03
3. Press the MODE key for 3 seconds or until you see the word LOAD displayed
4. To confirm – press the  key
5. You will then see the letters VAL displayed (Value to be loaded)
6. Press the  key to continue – you will then see VL: 25 flashing
7. Using the   keys select the correct value that you wish to load
8. Press  to OK
9. The Comet will now give you a new four digit code (e.g.84F2) you now need to key this code into the website
10. The site will return a new code that you need to insert into the Comet
11. Using the  to reach the CODE screen, insert the return code into the Comet (four digit alphanumeric code)
12. You will see 0000 displayed with the first 0 flashing. Using the   keys, insert the correct code, moving to the next digit using the MODE key
13. When you finish keying the code press  to OK
14. If the operation is successful the meter will show PASS if not "Er 01" message will appear. You can try again using the same code 7 times. For security reasons, seven consecutive failures will disable the loading option
15. Wait for the PASS word to appear on the display and the new updated bank

Once this process is completed, you can use the Comet to pay for on-street parking fees!

The motorist can reload the Comet 24 hours a day, 7 days a week
From any computer!
